Overarching Goal

- Reconstruct the Acq model to:
  - produce a better product faster
  - use tax $$$ efficiently
  - allow industry profit

- Expedite fielding
- Capitalize on initial investment
- Cradle to grave funding:
  - lowers cost
  - incentivize development with "guaranteed" funding for production

Oct 27th

- Clear Objectives
  - Report progress
- Determine whether this group will cont.
- Time frame for ROI & fielding (incr. Marketability)
- Obtain feedback on action items: recommendations

Actions: Now -> 27 Oct Near & Far Term Roadmap

- Feedback on AIs
- Feedback on SAB input
- Restate LtGen Kenne's objectives
- How to change business processes
- Define current state – Actions – End state
- Distinguish gov't $ industry objectives
- Interested parties
  - Layout interests, goals, view points, user/operator, ESC, industry

Roadmap

- Program stability
- Business processes (workflow) – pick a few examples to tackle
- Tomorrow
  - Flesh out action plan
  - Tie 4 Action Items into this
  - Options for way ahead

Roadmap

- Agreement on end state
- Clarify type of program
- Working group to examine overall acq process (funding, contracting, etc.)
  - Products:
    - step by step process
    - compare government and industry processes
- Two pieces
  - Infrastructure
  - Acq reform

Roadmap (cont)

- Shift to K's at higher level for C2 (more service less product)
- Apply ideas from 12-13 June

Future State

- Warfighter
  - Network centric
  - Interoperable, Integration, Fast
  - Get appropriate tools needed to accomplish the mission as quickly and cheaply as possible
  - Tools need to talk to legacy systems & migrate / integrate / access to future sys.
  - Create new enterprise sys.

- Industry
  - Reward innovation
  - Goal of x% Portal
  - Increase sales opportunity
    - Access to market
    - Decrease $ of capture
    - Insight / faster market
  - Increase profit margin
    - Decr $ of doing business
    - Increase workflow
    - Common process
  - Early & constant access / involv. in requirements, overall planning
  - Available sol'ns drive customer capabilities
  - Common bus framework

Future State

- Gov't
  - More efficiently use industry investments
  - Industry's practices for buying it
  - Significantly redux acq cycle time
  - Near instant resolution of user's problems
  - Flexibility – ability to change/adapt to hit the moving target
  - Cheaper
  - Common integrated infastructure that allows change
  - Standards based to move towards greater interoperability
  - Network centric

What do we do with these 4 action items?

1. Portal: Migrate toward GCSS compliant
   - Plan to eval what goes on and process
     - Structured access to portal (VTC?)
     - Demo Plan
   - Get agreements
     - Commitment to change (AF)
   - Recommend working group including center
   - Use portal to demonstrate acq reform
   - Implement consistent with GCSS framework
2. COE
   - Action closed
   - ESC/DI take over
3. Desire/Requirement
   - Define levels in working group
4. Business Case
   - Investigate in working group

Portal

- Plan to eval what goes on and process
  - structured access to portal (VTC?)
  - [Demo plan]
- Get agreements
  - Commitment to change (AF)
- Recommend working group incl. Center
- Use portal to demonstrate acq reform
- Implement consistent w/ GCSS framework
